# Pramey - More Deterministic Answers

## How it works

An intelligent RAG system having

### Secure Document Upload

Customers can upload their private documents, which Pramey processes, comprehends, and assimilates into its knowledge base using proprietary algorithms and advanced techniques.

1

### Precise Answers

Provides accurate answers, specific to customers, eliminating hallucinations. Bespoke design to understand, predict and control outcomes.

2

### Dashboard and Admin controls

Dashboard for monitoring and maintaining the knowledge and ensuring the responses are accurate and aligned to user expectations.

3

## CORE COMPONENTS

### Propriety Knowledge Hub

Continuously learns from documents, LLMs and human feedback and provides predictability to responses

### Data Control and Management

Control and manage the underlying data of responses to ensure accuracy. Provides insight on data and system

### Clear Traceability of Outcomes

Trace responses to the source snippets of documents for confidence in results

## REAL-LIFE APPLICATIONS

### BANKING & FINANCE

Clarification on products, configuration support and functional or technical issue resolution

### INSURANCE

Compare policies and get detailed clarification

### HR & ADMIN

Query internal policies and procedures with accuracy

### SUPPORT & CALL CENTER

Resolve customer queries faster, provide agentic support and help in issue analysis

# Why to choose Pramey?

## Unique Differentiators:

1

### **Authentic Document Focus**

Provides answers based solely on validated and uploaded documents, unlike generic internet-based LLMs

### **Predictability and Control**

With its unique design and tools it enhances the predictability of responses and provides a good control of them

2

3

### **Near Zero Hallucinations**

Offers only factual, document-based responses with no made up answers.

### **Clear and Comprehensive traceability**

Trace the exact source of answers and tools to track how the response was chosen from Knowledge store

4

5

### **Production-Ready**

Designed for live enterprise systems.

### **Learning Hub**

Continually enhances its capabilities using Reinforcement Learning with Human Feedback (RLHF).

6

7

### **Cost Efficiency**

Reduces LLM usage costs by resolving most queries through its proprietary knowledge store.

### **Multi-Tenancy Support**

Enables strict segregation of data for multiple users or departments.

8

9

### **Customizable Creativity**

Users can adjust the creativity level of responses to suit specific needs.
